

Generative AI for Research and Document Summarization Potential Solution

This solution is broken out into two sections:

- Part I - Copilot Project Charter Research Solution
- Part II - NotebookLM Screenshot

Note: Your solutions may differ. Generative AI provides various responses to similar prompts. This solution is provided for comparison purposes.

Part I – Copilot

Project charter: Coffee chain business App development

Project title: BrewTech - coffee chain business App

Project start date: June 1, 2024

Projected end date: December 31, 2024

Project manager: Jane Doe

Purpose: To develop a comprehensive business app, BrewTech, that will streamline operations, enhance customer experience, and support the growth of the coffee shop chain.

Objectives

- To provide a user-friendly platform for customers to place orders, earn rewards, and receive updates.
- To integrate inventory management, sales tracking, and employee scheduling within the app.
- To utilize data analytics for informed decision-making and marketing strategies.

Scope

- Design and development of the BrewTech app for iOS and Android platforms.
- Integration with existing POS systems and databases.
- Training for staff on app usage and functionalities.

Resources

- Development Team: UI/UX Designers, Mobile Developers, Backend Developers, QA Testers.

Generative AI for Research and Document Summarization Potential Solution

- Marketing Team: Brand Strategists, Content Creators, Social Media Managers.
- Operations Team: Inventory Specialists, HR Managers, Financial Analysts.

Budget: \$250,000

Approval Signatures

- [CEO's Name], CEO
- [CTO's Name], CTO

Attachment 1: Key Stakeholders

Stakeholder	Role	Responsibilities
CEO	Executive Sponsor	Provide project oversight and strategic direction.
CTO	Technical Advisor	Offer technical guidance and ensure tech standards.
Project Manager	Project Lead	Oversee project execution and team coordination.
Development Team	App Developers	Design, build, and test the BrewTech app.
Marketing Team	Branding & Promotion	Develop marketing strategies and promote the app.
Operations Team	Operational Support	Implement app features in daily operations.

Generative AI for Research and Document Summarization Potential Solution

Attachment 2: Potential Project Risks

Risk	Impact	Probability	Response
Technical Delays	High	Medium	Employ agile methodology and have contingency plans.
Budget Overruns	Medium	Low	Regular financial reviews and allocate reserve funds.
User Adoption	High	Medium	Conduct market research and beta testing with incentives.

Attachment 3: Milestone Chart

Milestone	Date	Details
Project Kickoff	June 1, 2024	Initial team meeting and project briefing.
App Design Completion	July 15, 2024	Finalize app designs and user interfaces.
First Prototype	August 30, 2024	Develop and test the first functional prototype.
Beta Testing	October 15, 2024	Release beta version for select customers.
App Launch	December 1, 2024	Official release of the BrewTech app.

Generative AI for Research and Document Summarization Potential Solution

Project Closure	December 31, 2024	Final documentation and project handover.
-----------------	-------------------	---

Summary: This charter serves as a foundational document for the project. It outlines the primary goals, scope, and structure of the project, and it will be refined as the project progresses. The attachments provide a high-level overview of the stakeholders involved, potential risks to be managed, and a timeline for key milestones.

 Source guide

Summary

This source is a project charter for "BrewTech," a proposed business app for a coffee shop chain. **The app aims to provide a user-friendly platform for customers while also streamlining the chain's operations, enhancing customer experience, and supporting growth.** The charter outlines a seven-month timeline, a budget of \$250,000, and designates key personnel like the project manager and the development team. To ensure the project's success, the charter identifies potential risks, such as technical delays and budget overruns, and proposes mitigation strategies. Finally, it includes a milestone chart that breaks down the project into manageable phases, from the initial kickoff to the official app launch.

Key Topics

- App Development
- Risk Management
- Project Timeline
- Team Roles
- Project Budget
