

Hands-on Lab: Generative AI Ethical and Bias Analysis

Estimated duration: 30 minutes

Introduction

Project managers play a crucial role in identifying bias and ethical issues within Generative AI outputs. They must ensure AI products resulting from projects are not only effective but also fair and responsible. It is their responsibility to closely monitor AI outputs, analyze feedback, and detect any instances of bias or ethical concerns that may arise. The Project Managers play a vital role in ensuring that Generative AI outputs uphold ethical principles and serve the needs of diverse user communities.

This lab presents two projects proposing two new products. You will receive Product Descriptions that form the basis of the Project Charter. We intentionally included bias and ethical issues in the descriptions. You must identify any bias and ethical issues and rephrase the descriptions to remove the biased and unethical verbiage.

Objectives

- Review the two product descriptions
- Description 1 & 2: Determine verbiage that includes biased language or ethical issues. Rephrase the description to be ethically sound and bias-free

Project Description 1:

We approved a new project for developing a dynamic new product. The EcoCleanse Juicer is undoubtedly the best juicer on the market. It's designed exclusively for those who understand the importance of health and are smart enough to invest in their well-being. Unlike other juicers, the EcoCleanse Juicer preserves 100% of the nutrients, ensuring that only the most intelligent consumers can maintain their health in today's world. Our product is not just a juicer; it's a lifestyle choice for the educated elite who want to live longer and outshine the average person.

Project Description 2:

We plan to complete a high-priority project to develop a SmartSaver Financial App. The app is the only sensible choice for anyone who truly values their hard-earned money. It's the preferred app among the wealthy and successful, as it's designed for those who are wise

enough to strive for a prosperous future. SmartSaver users are known to be more affluent and financially savvy than the average person, as they use exclusive features that other apps simply don't offer. Additionally, SmartSaver proudly uses advanced algorithms to predict and influence market trends, giving our users an unmatched advantage in the financial world.

Prerequisites

- Access to MS Word or an equivalent document reader

Step-By-Step Lab Tasks

Document download instructions

To download the document, keep the CTRL key pressed and click the document link.

Use the COMMAND key instead of CTRL on Mac systems.

Task 1: Download the [Generative AI Ethical and Bias Analysis Worksheet](#).

Task 2: Analyze Project Description 1. Identify biased or ethical concerns. Annotate these concerns on the worksheet.

Task 3: Edit Project Description 1. Remove the bias and ethical concerns while preserving the product description's merit.

Task 4: Analyze Project Description 2. Identify biased or ethical concerns. Annotate these concerns on the worksheet.

Task 5: Edit Project Description 2. Remove the bias and ethical concerns while preserving the product description's merit.

Task 6: Compare your findings with a friend or associate. Ask their opinion on the validity of your analysis.

Task 7: Review the [Generative AI Ethical and Bias Analysis Solution](#). How does your analysis compare?

Have fun in the lab! We hope you will be able to rephrase the description to be ethically sound and bias-free!
