

Hands-on Lab: Generative AI Opportunities Analysis

Estimated duration: 30 minutes

Introduction

ChatGPT can generate valuable text outputs based on user prompts, engage in conversations, answer questions, or generate creative content. It serves as a valuable tool for the project manager.

Objectives

You will use ChatGPT 3.5 to develop a Project Charter in this lab. You need to enter the following details in the Project Charter:

- Project requirements: Recommended features for the product
- Problem or Opportunity Statement
- Project Success Criteria

Prerequisites: Accessing ChatGPT (v3.5)

To find and use ChatGPT, you can follow these steps:

Instructions for accessing the web page links in a new tab

To access the web pages in a new tab, keep the CTRL key pressed and click the web page link.

Use the COMMAND key instead of CTRL on Mac systems.

1. **Visit the OpenAI Website to access ChatGPT:** Navigate to <https://openai.com/chatgpt> using your web browser. Look for the ChatGPT feature on the OpenAI website. It could be prominently featured on the homepage, or users can access it through a specific section or page.

2. **Engage with ChatGPT:** After accessing ChatGPT, you will typically see a text input box where you can type your messages or prompts. Start typing, and ChatGPT will respond based on the input you provide.
3. **Interact and Explore:** Engage in conversation with ChatGPT by asking questions, providing prompts, or sharing ideas. ChatGPT will respond conversationally, generating text based on its training and understanding of natural language.
4. **Experiment and Discover:** Explore ChatGPT's capabilities using different prompts and questions. You can ask for information, seek advice, brainstorm ideas, or engage in casual conversation.
5. **Feedback and Improvement:** If you encounter any issues or have suggestions for improvement, you can provide feedback to OpenAI through their website or platform.
6. **Privacy and Safety:** Use ChatGPT responsibly and avoid sharing sensitive or personal information. OpenAI prioritizes user privacy and safety, but you should always be cautious when interacting with AI systems online.

Scenario

You are the project manager working for a technology firm. The business case for developing an AI-driven professional photo generator that customers can use for various purposes has received approval. This product will be an app that customers can download and use at a moderate cost.

Currently, you are developing the Project Charter for presentation to a Project Sponsor for approval. You aim to utilize ChatGPT to ensure that your Project Charter meets the needs of customers and the firm and provides value.

Tasks

Document download instructions

To download the document, keep the CTRL key pressed and click the document link.

Use the COMMAND key instead of CTRL on Mac systems.

Task 1: Access ChatGPT. This service is free. Follow the directions defined in the "Prerequisites" section. (**Note:** If you haven't already performed the steps, follow the directions in the **Prerequisites** section.)

Task 2: Think about and develop your initial prompt. Review the reading "The Power of Prompts." Keep your prompt simple, avoid ambiguity, and provide background information. For details, review the reading ["The Power of Prompts."](#)

Task 3: Generative AI systems like ChatGPT allow you to build on the conversation. Use a series of prompts to attain the information you need for your Project Charter. The quality of your prompts is critical. Keep your prompts short, concise, and actionable. Note that you may ask ChatGPT the same question twice and get two different responses! Here is an example of an alternative project scenario with sample prompts.

Prompt 1

I am managing a project to develop a generative AI-powered portable air filtration system. This product will be application-based. What key features should I consider for this product to appeal to a wide market segment?

Copy Prompt 

Prompt 2

Can you prioritize each of these features in terms of their importance to customers?

Copy Prompt 

Prompt 3

Can you create a brief problem or opportunity statement to support this project concept?

Copy Prompt 

Prompt 4

Can you provide Project Success Criteria for this project in the form of Key Performance Indicators?

Copy Prompt 

Task 4: Use the [Generative AI Opportunities Analysis Worksheet](#) to document what you believe are the top requirements in priority order. Then, complete the worksheet by documenting the Problem or Opportunity Statement and the Project Success Criteria as Key Performance Indicators.

Task 5: Compare your findings with peers taking the course. Ask their opinion on the validity of the output.

Task 6: Review the [Generative AI Opportunities Analysis Potential Solution](#) for an AI-powered photo generator. How does your information compare?

Note 1: A Project Charter should be brief and concise. ChatGPT will provide more information and details than you require. Use this information to determine which outputs are relevant to your project.

Note 2: Your Project Sponsor must approve your Project Charter. Use the information provided by ChatGPT to help develop more detailed project plans during project planning based on the features approved in the final Project Charter.

Have fun in the lab! We hope your AI-powered photo generator is a huge success!
