

Lab: Develop a Product Concept Document

Estimated duration: 45 minutes

In this lab, you will develop a product concept document.

Learning objectives:

At the end of this lab, you will be able to:

- Review your product SWOT from the previous lab.
- Develop a product concept document.

Prerequisites:

1. You must have Microsoft Word installed on your computer or a Microsoft Office 365 account online.
2. Ensure you reviewed the following reading and videos:
 - Video: Creating the Product Concept Document
 - Reading: Product Concept Document Checklist

Exercise

1. Keeping the CTRL key pressed, click [here](#) to download the **Develop a Product Concept Document Template** MS Word document.

Note: Use the COMMAND key instead of CTRL on Mac systems.

2. Review the product SWOT you completed in the previous lab.
3. Complete the product concept document using the instructions and template provided.

4. Save your product concept document with a distinct name you can remember. This document can become part of an overall personal portfolio of tools, techniques, and skills you have learned to apply. This example can be beneficial to share with peers, referenced for real-world opportunities to use the tool, or shared with current and prospective employers to highlight your skills and competencies.
