

Hands-On Lab: Cybersecurity Career Paths

Estimated time needed: 20 minutes

In this lab, you will explore the Cyber Seek website, which contains detailed information about cybersecurity career paths at the various career levels: entry-level, mid-level, and advanced level.

Objectives

After completing this lab, you will be able to:

- Explore the Career Pathway
- View the common pathways, and transitions from entry-level to mid-level and advanced-level careers
- Explore the skills and certifications required for different job titles
- Explore the interactive map for the United States to view the job opportunities in any state (optional)

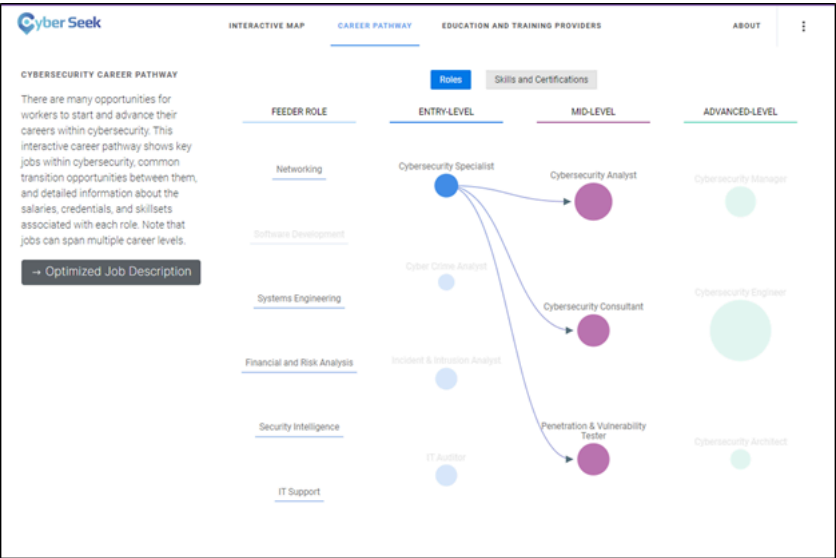

Exercise 1 : Explore Career Pathway

In this exercise, you will explore the different career pathways from entry-level to mid-level and advanced -level.

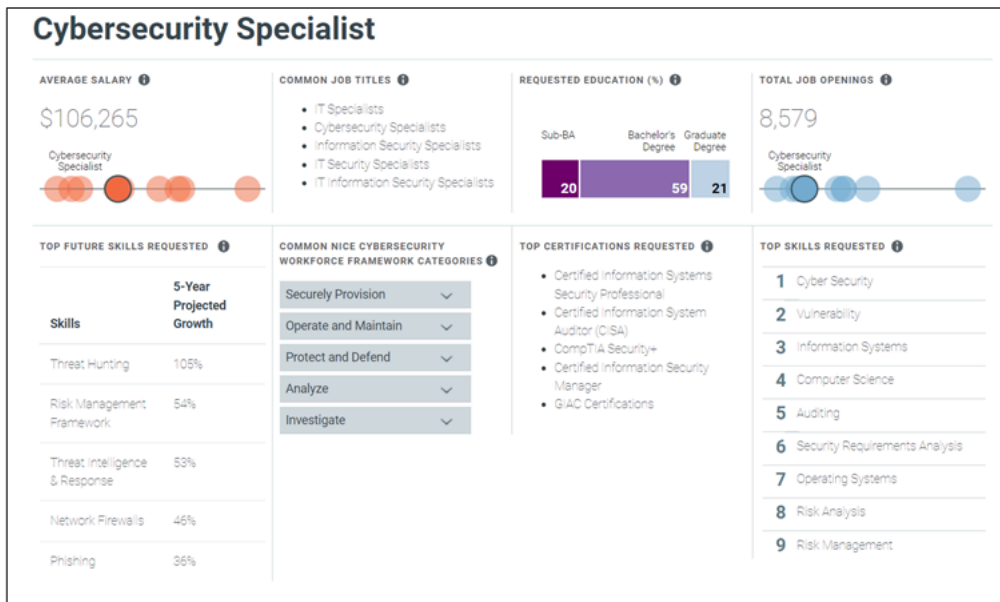

1. Navigate to [Career Pathway](#).
2. This tool provides an interactive representation of cybersecurity jobs and roles, common pathways, and transitions from entry-level to mid-level and advanced-level careers. Click any role, for example, **Cybersecurity Specialist**.

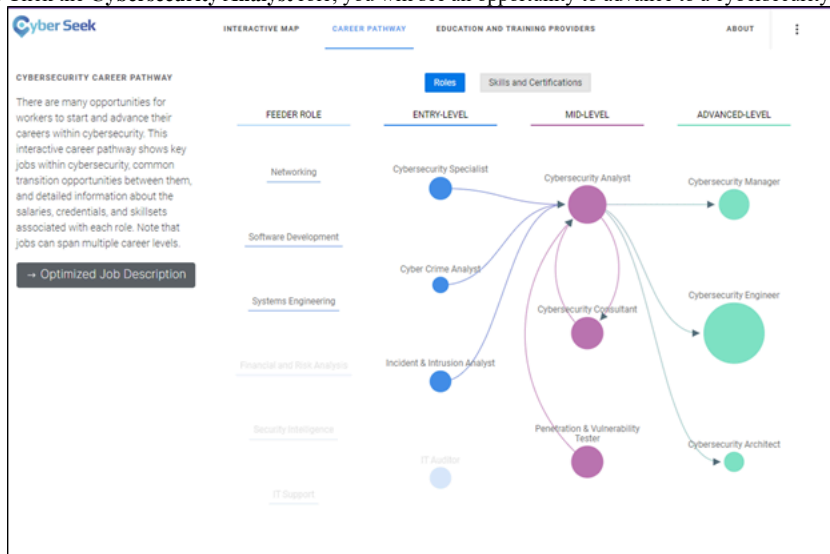

You will see an opportunity to advance to mid-level careers such as a cybersecurity analyst, a cybersecurity consultant, or a penetration and vulnerability tester.

3. Scroll down the page; you will see more information on average salaries, commonly requested certifications, and commonly requested skills.

4. Click the **Cybersecurity Analyst** role; you will see an opportunity to advance to a cybersecurity manager, cybersecurity engineer, or cybersecurity architect role.

5. Explore this page to learn more about each role type, especially those that interest you the most.

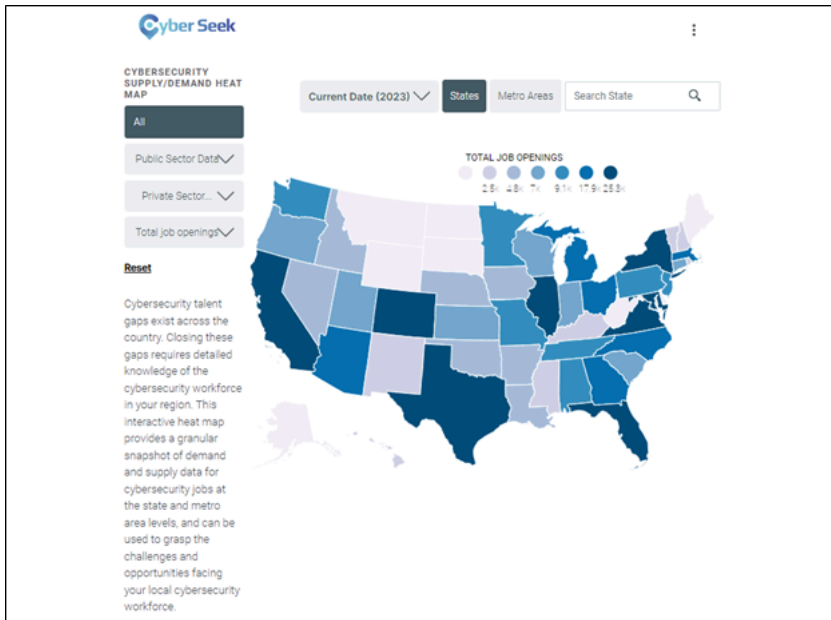

6. You can also explore the various skills and certifications required for each role type by clicking [Skills and Certifications](#) at the top of the page.

CYBERSECURITY CAREER PATHWAY		
There are many opportunities for workers to start and advance their careers within cybersecurity. This interactive career pathway shows key jobs within cybersecurity, common transition opportunities between them, and detailed information about the salaries, credentials, and skillsets associated with each role. Note that jobs can span multiple career levels.		
→ Optimized Job Description		
FEEDER ROLE	ENTRY-LEVEL	ADVANCED-LEVEL
Networking	Cybersecurity Specialist	Cybersecurity Manager
Software Development	Cyber Crime Analyst	Cybersecurity Engineer
Systems Engineering	Incident & Intrusion Analyst	Cybersecurity Architect
Financial and Risk Analysis	IT Auditor	
Security Intelligence		
IT Support		

TOP CERTIFICATION	JOB TITLE	TOP SKILLS
Certified Information Systems Security Professional (CISSP)	Cyber Crime Analyst	Information Security / Assurance
Certified Information Systems Auditor (CISA)	Cybersecurity Engineer	Security Operations
Certified Information Privacy Professional (CIPP)	Cybersecurity Analyst	Cryptography
Certified Information Security Manager (CISM)	Penetration & Vulnerability Tester	Risk Assessment and Management
Global Information Assurance Certification (GIAC)	Cybersecurity Consultant	Threat Analysis
CompTIA Security+ Certification	Cybersecurity Manager	Authentication
	Cybersecurity Specialist	Network Security
	Incident & Intrusion Analyst	NIST Cybersecurity Framework
	IT Auditor	Internal Auditing
	Cybersecurity Architect	

[Optional]Exercise 2 : Explore Interactive Map

1. You have the choice to explore the interactive map for the United States. Select [Interactive Map](#) tab at the top of the page.
2. An interactive map will be displayed. When you hover over each state, you will see information on how many existing cybersecurity-related job opportunities are available in that state. Select one of the states to see current details and historical information specific to that state.

Conclusion

In this lab, you have learned the various available career pathways in cybersecurity using the Cyber Seek website.
