

Hands-on Lab: Final Project

Estimated duration: 60 minutes

Introduction

Welcome to our final project. You will have an opportunity to act as a project manager to develop key documents and marketing images to support a new and innovative product powered by generative AI.

The Scenario

Elevate Eats is a revolutionary AI-driven platform that transforms personal health and culinary experiences. Our vision is to seamlessly integrate technology, nutrition, and wellness to cater to each individual's unique dietary needs and health goals.

Elevate Eats' mission is to provide users with personalized recipe recommendations that are delicious and aligned with their health metrics and dietary preferences. Elevate Eats aims to become essential to daily health management, making healthy eating effortless and enjoyable.

This product development is a six-month project. Key deliverables include an AI-driven app and marketing collateral to support the product launch.

Objectives

Use Copilot, ChatGPT, or Gemini to develop:

1. A Project Charter which includes:
 - Project title
 - Project requirements
 - Business need
 - Project success criteria
 - Summary schedule
 - Key stakeholders
 - Assumptions and constraints

2. A Project Requirements which includes:
 - A high-level WBS
 - Project phases will feature plan, design, develop, test, and launch
3. A Project Milestone Chart which include:
 - The firm aims to develop and launch the product in versions over a six-month or two-quarter timeframe
4. Use DALL-E 3 to generate two marketing images:
 - Show one or two happy and healthy customers using the product
 - Provide a packaging recommendation for the product

Prerequisites

- Access to Copilot, ChatGPT, Gemini, and DALL-E-3.

Instructions for accessing the web page links in a new tab

To access the web pages in a new tab, keep the CTRL key pressed and click the web page link.

Use the COMMAND key instead of CTRL on Mac systems.

- Navigate to <https://openai.com/chatgpt> using your web browser to access **ChatGPT**.
- Navigate to <https://copilot.microsoft.com/> using your web browser to access **Copilot**.
- Navigate to <https://gemini.google.com/> using your web browser to access **Google Gemini**.
- Navigate to <https://copilot.microsoft.com/> using your web browser and click the **Designer** option to access **DALL-E 3**.

Step-by-step tasks

Task 1: Download the [Final Project Worksheet](#) to document the critical documents and images you will require to support Elevate Eats new and innovative product.

Document download instructions

To download the document, keep the CTRL key pressed and click the document link.

Use the COMMAND key instead of CTRL on Mac systems.

Task 2: Develop prompts in your preferred generative AI tool to access ideas and complete the required product concept entries. It will include:

- Project Charter
- WBS
- Milestone Chart

Task 3: Develop prompts in DALL-E-3 to generate the marketing images you require.

Task 4: Compare your findings with a friend or associate. Ask their opinion on the validity of your generative AI analysis.

Task 5: Review the [Final Project Potential Solution](#) document. How does your analysis compare?

- We have provided a potential solution using ChatGPT and DALL-E 3 for your reference. This solution shares the prompts for developing the required documentation, images, and ChatGPT results.
- **Note 1:** Your solution will differ. Generative AI tools such as ChatGPT, Copilot, Gemini, and Designer DALL-E 3 provide unique outputs to similar prompts.
- **Note 2:** Refer to the course demo videos for guidance.
