

Hands-on Lab: Final Project

Estimated duration: 60 minutes

Introduction

Welcome to the final project. You can act as a product manager to develop critical documents and images to support a new and innovative product powered by generative AI.

Objectives

Use Copilot, ChatGPT, or Gemini to develop:

- Product concept
- Product requirements
- Product roadmap
- Marketing images

Prerequisites

- Access to Copilot, ChatGPT, Gemini, and DALL-E-3.
- Navigate to <https://openai.com/chatgpt> using your web browser to access **ChatGPT**.
- Navigate to <https://copilot.microsoft.com/> using your web browser to access **Copilot**.
- Navigate to <https://gemini.google.com/> using your web browser to access **Google Gemini**.
- Navigate to <https://copilot.microsoft.com/> using your web browser and click the **Designer** option to access **DALL-E 3**.

The Scenario

Elevate Eats is a revolutionary AI-driven platform transforming personal health and culinary experiences. Our vision is to create a seamless integration of technology, nutrition, and wellness that caters to each individual's unique dietary

needs and health goals. Elevate Eats Mission provides users with personalized recipe recommendations that are delicious and aligned with their health metrics and dietary preferences. Elevate Eats aims to become essential to daily health management, making healthy eating effortless and enjoyable.

Tasks

Download the Final Project Worksheet [Final Project Worksheet](#) to document the critical documents and images you will require to support Elevate Eats new and innovative product.

Document download instructions

To download the document, keep the CTRL key pressed and click the document link.

Use the COMMAND key instead of CTRL on Mac systems.

Task 1: Develop prompts in your preferred generative AI tool to access ideas and complete the product concept entries as required. The product concept should include the following:

- What markets should we target?
- What is the competitive landscape?
- What costs must we consider?
- How can we commercialize this product?
- Draft a value proposition

Task 2: Develop a list of prioritized product features. Create prompts in your preferred generative AI tool to access ideas and complete the product requirements entries as required.

Task 3: Develop a product roadmap to launch the product in versions over a one-year or four-quarter timeframe. Create prompts in your preferred generative AI tool to develop the product roadmap as required.

Task 4: Develop prompts in DALL-E-3 to generate the marketing collateral images as follows:

- Show one or two happy and healthy customers using the product
- Provide a packaging recommendation for the product

Task 5: Compare your findings with a friend or associate. Ask their opinion on the validity of your Generative AI analysis.

Task 6: Review the [Final Guided Project Potential Solution](#) document. How does your analysis compare?
