

Hands-on Lab: Generative AI for Research and Imaging

Estimated duration: 30 minutes

Introduction

Generative AI tools assist a product manager when performing required research to develop an effective product concept, product requirements document, and marketing requirements document.

This lab will feature a scenario that will challenge you to develop prompts and gather information to produce deliverables for a new AI-driven product concept.

Objectives

- Review a brief scenario introducing a new product concept to support an oral hygiene company called BrightBite LLC.
- Gather information to complete selected portions of a product concept document.
- Gather potential feature information to support selected portions of a product requirements document.
- Solicit potential images to use for your marketing collateral.

Prerequisites

- Access to **Copilot** and **DALL-E 3**
- Navigate to <https://copilot.microsoft.com/> using your web browser to access **Copilot**
- Navigate to the **Designer** option in Copilot to access **DALL-E 3**

Scenario

You work for BrightBite LLC. BrightBite is a company that features oral care and dental hygiene products. Marketing interviewed several customer segments and

discovered a problem. Many customers forget to replace their toothbrush heads regularly. Not replacing toothbrush heads leads to ineffective brushing and potential hygiene and health issues. The team decided to address a smart solution that monitored toothbrush usage, tracked frequency of use, reminded users to replace their toothbrush heads, and even sterilized the heads between uses. A secure app will power these features that users can download and personalize at no additional cost. They named the product "BrushSmart."

Prompt 1

You need some information to analyze before completing your product concept document. Specifically, you want to know:

- What market segments should we target?
- What are the costs we must consider?
- What is the competitive landscape?
- A product vision statement

Prompt 2

You identified some basic features you want to include in BrushSmart. You are drafting your product requirements document. Specifically, you want to:

- Ensure you are not missing any potential features
- Prioritize each feature to develop a product roadmap eventually

Prompt 3

Finally, you want to develop some images of happy customers using BrushSmart. Specifically, you need:

- Potential images you can include in marketing collateral
- Potential packaging ideas

Tasks

Task 1: Develop prompts in Copilot to access ideas and complete the required product concept document entries.

Task 2: Develop prompts in Copilot to access ideas to complete the product requirements document entries required.

Task 3: Develop prompts in DALL-E 3 to access the images you require for developing the required market collateral.

Task 4: Compare your findings with a friend or associate. Ask for their opinion on the validity of the generative AI analysis.

Task 5: Review the [Generative AI for Research and Imaging Solution](#) document. How does your analysis compare?
